Subject: Niagara Falls Boulevard Radiological Site - Structural Engineering Specialized Labor Support
Structural Engineer - Cost Breakdown July2016.pdf

Eric,

Per your request, RST 3 has procured the services of a Weston structural engineer to support the EPA during the Removal Action being conducted at the Niagara Falls Boulevard Radiological Site under TDD No. TO-0007-0014. The structural engineering support being requested can all be completed remotely. The structural engineer will research the requirements for restoration work that is to be conducted at the 9540 Niagara Falls Blvd property. Specifically, the local building code requirements for concrete work within a commercial structure. One area is the office space, the remaining areas are the warehouse storage where inventory will be stored and equipment (i.e. forklifts) will be operating. The Weston structural engineer will research all applicable local and state building codes and provide a summary report of his findings. The structural engineer will also be available to support the Removal Action activities as requested. It is estimated that 25 hours will be required to support the current level of effort being requested. **The total cost for the structural engineering support is \$4,022.06 (please find attached the detailed cost breakdown).**

Please concur to this email if you are in agreement and then I will forward the necessary paperwork over to the contract folks. If you have any questions or comments please let me know.

Thanks,

Timothy Benton, CHMM
